Summary

Experienced web developer with 8 years of expertise in IT. Skilled in JS, React, Node.js, TypeSript and related technologies etc, with a passion for IT industry. I am committed to delivering high-quality work and achieving results that exceed expectations. Looking for new opportunities to apply my skills and collaborate with like-minded professionals. Let's connect and explore how we can work together.

Experience

Frontend Web Developer

CargoX

Aug 2022 - Jan 2023 (6 months)

Key Responsilities:
- Developing, maintaining and optimizing product made from scratch
- Designing and implementing the document generation system
- Apply design to web application
- Integrating the application with third party services
- Testing and debugging the application
- Collaborating with other team members

Team Collaboration:
- Brainstorming and planning
- Cross functional reviews
- Agile development

Lessons learned:
- Feedback is the key to improvement, but only when it's delivered in a constructive and supportive manner.
- The greatest glory in living lies not in never falling, but in rising every time we fall.
- Trust yourself. You know more than you think you do.
- Get familiar with new technologies and learned more about architecture

Reason:
- Not good fit.

Full-stack Developer

Papercast

Jan 2022 - Oct 2022 (10 months)

Key Responsibilities:
- Developing, maintaining and optimizing serverside rendering on product devices
- Creating responsive designs that are optimized for various devices and screen sizes
- Writing clean, maintainable, and scalable code

- Collaborating with other developers to understand project requirements and implement solutions
- Troubleshooting issues and debugging code to ensure optimal performance and functionality
- Setup Grafana and collaborating with system administrators
- Migration from AngularJS to React

Team Collaboration:
- Collaboration with other team members run through communication channels and project management tools as much as verbaly.
- Collaborated with project manager and members and gave input to make end decisions about technologies and steps for migration and optimization and having discussion about new features being developed
- We acomplished to deliver various new features, major two were newly developed widgets and parallelization of rendering and serving this to client devices

Lessons learned:
- Collaborating and managing tasks
- Server side rendering
- Optimizing techniquies
- Server management
- Networking
- Parallelization
- Should stick to one communication channel

Reasons for leaving:
- Financial cutting
- Wish was to assign me to a different project with technology that I wasn't interested at that time
- Better offer

Full-stack Developer

httpool
Apr 2018 - Dec 2021 (3 years 9 months)
Duties and Responsibilities:

When I joined Httpool I went to the Twitter team where I was responsible for looks of new application for campaign and ad management. Even though I was mainly there for the frontend role I also gave input on the backend. Here I developed various GraphQL mutations and queries, managed with MySql database, writing migrations and interacting with external APIs. While on the other side I developed interesting reusable components, migrating to newest stable packages, migrating to newest React versions with usage of functional programming with breath of OOP. With usage of data visualization and grid presentation tools we provided the ability to easily manage and watch statistics and data that is important to end users. I was also responsible for test coverage integration.

Technologies: React, MySQL, PHP, GraphQL, Less

Software Engineer

Sep 2017 - Jan 2018 (5 months)
Duties and Responsibilties:

- modifications on existing web application
- REST
- designing site components
- rebranding application
